Buying a bonus instantly activates bonus rounds for a specified fee. There are also multipliers that can increase potential prizes. The demo version allows you to familiarize yourself with the entertainment and its features without risking real funds, while the paid mode provides a chance to win real prizes.

Bonus Features in Sugar Rush

In Sugar Rush, gamblers can immerse themselves not only in an exciting game but also take advantage of exclusive bonuses that make the process even more intriguing and increase the chances of substantial payouts. One of the unique features of the machine is the mechanic where winning images pop, leaving a mark in their place. If a win occurs again in the same position, and the symbol pops, a multiplier is activated, doubling the winnings. This process can continue, increasing the multiplier to a maximum value of x128. Multipliers apply to all wins that occur in that position and can combine with other multipliers, resetting after the end of the bonus spin.

The free spins round is a particularly attractive moment, activated when three or more Scatters appear. The number of free spins depends on the number of Scatter symbols that land and can range from 10 to 30 spins. During this round, active cell multipliers are retained. The appearance of additional Scatters during free spins can lead to even more spins.

The maximum win in the game can reach up to 5000x the total bet, which applies both in the base game and during the bonus round, creating significant potential for big wins. These features, combined with dynamic gameplay, make playing the machine especially appealing to users looking to test their luck.

Option to Buy Free Spins

Sugar Rush offers a special option to buy a bonus. It allows players to instantly activate the bonus by paying a specific amount, which depends on the chosen bet. The process of using this option works as follows:

- There is a special button on the interface, located to the left of the reels and highlighted as a separate icon.
- When activated, the player is offered to pay an amount equal to 100 times their current bet.
- After agreeing to the terms and confirming the purchase, the corresponding amount is deducted from the balance.

- Immediately after payment, the bonus round is automatically triggered. A random number of Scatter icons appear on the screen, and the number of received free spins is displayed.
- Once the bonus round ends, all winnings are credited to the user's account, and they can continue spinning in the regular mode.

Using this option requires additional financial investment and can be quite costly. Therefore, it is important for gamblers to be aware of the associated risks and be prepared to invest for immediate access to bonuses.
